

Energy saving nursery visits – Booking Form

Come along to either Wight Salad's Arreton Valley Nursery on the Isle of Wight or Flavourfresh's Lansdale Nursery in Lancashire to learn more about selecting and operating CO₂ enrichment systems.

Following the proven GrowSave format:

- We will spend the morning reviewing the theory and options in an informal setting. Your ideas and questions are a vital part of this session.
- In the afternoon we will tour the nursery to see first hand what our host is doing in the greenhouse.

The visits are open to all HDC Members, with a maximum of 18 delegates, allocated on a first come first served basis. If you would like to attend, please complete and return this form to reserve your place.

BASIS and NRoSO points have been applied for.

Contact details - complete & return to Farm Energy to secure your place.

Company name		HDC membership no.
